Similar to Investors and Developers, the DATRO Consortiums Creditors can expect loans and interest to be extinguish (fully-autonomously) by our Decentralized Autonomous Society (DAS). The latest method employed for this process, resides with cryptocurrency DOT and the Polkadot blockchain, in which the latest version of this document is regularly and autonomously scraped by a smart contract to determin the lenders, interest and division of funds designated for distribution.

RELEASE NOTES AND NOTICES

This section provides information about what is new or changed, including urgent issues, documentation updates, maintenance and new releases. - 'Updates' are the term used to describe significant changes to our public source code and/or records.

1.1 This Release (0.0.4)

2021-05-06 - The archives may display semantic version format 'v0.1.x' but this was incorrect. They've been corrected and changed to 'v0.0.x' **2021-05-06** - 'The nomenclatures have been updated (from Wave to DATRO) in this latest document.

1.1.1 Older Versions

1.1.2 Version 0.0.3

This document has the following updates since version 0.1.0 was published:

- Further lending obtained, records updated!

1.1.3 Version 0.0.2

- Changes to presentation of data more than data itself.

1.2 Known and Corrected Issues

Below is a table of pending issues which have been reported to our team. These issues will be cleared from this list as and when they are remedied.

Table 2: Known Issues

Date	Version	Subject	Description
09-01-2019	0.1.0	bad link	Shell script had wrong link (so it pulled a wrong record). Fixed it - see notes!

Comments - none

1.3 Recently Updated Topics

Nothing significant to report

INTRODUCTION

Unlike most organisations, DATRO simultaneously operates its own bespoke and internal cryptocurrency banking system and services. This new trend in tech, business and finance is most commonly referred to as Decentralised Finance (DeFi) and a Decentralised Autonomous Organisation (DAO). This report focuses on Creditors only. To fully understand DeFi and DAO's, readers are advised to research from other sources e.g. Wikipedia

DATRO's DAO is also being developed to autonomously maintain these financial reports, updating them each time a block of transaction occurs, in order it remains as consistent as possible to the institutional method of changelogs, reports and document archiving for smoother transition from company to DAO. At the time of writing these reports are compiled from source by a system administrator and custom build script, in order to check processes and procedures before going fully autonomous. In the event of a new release, our DAO will autonomously archive the source files of the previous version alongside the 'latest' directory e.g. 0-0-1, 0-0-2 etc. And autonomously archive the previously compiled PDF in our wayback archive, then reference the compiled PDF in the release notes of the new publication (under the section 'previous versions').

The concept of loans, interest and other such financial instruments surrounding promissory notes isn't new. But our DAO method is a preferred way of automating the administration, transactions and record-keeping of this business area. Our DAO is also sometimes referred to as a DAS (Decentralised, Autonomous Society) due to the magnitude of the stakeholders involved, which constitute the organisation being a stand-alone society and not just a typical organisation.

CREDITOR ACCOUNTS

3.1 Summary

See below a summary of the DATRO Consortiums Creditors Accounts:

Table 1: DATRO Creditor(s) - Master Register

UID	Wallet ID/ Alias	Deposited (GBP)	Interest 10% (GBP)	Balance (GBP)
