Similar to Investors and Developers, the DATRO Consortiums Creditors can expect loans and interest to be extinguish (fully-autonomously) by our Decentralized Autonomous Society (DAS). The latest method employed for this process, resides with cryptocurrency DOT and the Polkadot blockchain, in which the latest version of this document is regularly and autonomously scraped by a smart contract to determin the lenders, interest and division of funds designated for distribution.

RELEASE NOTES AND NOTICES

This section provides information about what is new or changed, including urgent issues, documentation updates, maintenance and new releases. - 'Updates' are the term used to describe significant changes to our public source code and/or records.

Nothing significant to report

INTRODUCTION

Unlike most organisations, DATRO simultaneously operates its own bespoke and internal cryptocurrency banking system and services. This new trend in tech business/ finance is most commonly referred to as a Decentralised Autonomous Organisation (DAO). To fully understand this report, readers are advised to briefly research DAO's online e.g. Wikipedia

DATRO's DAO is also expected to be able to re-write this financial report each time a transaction occurs in order it remains concurrent and as close to possible as the institutional method of changelogs, reports and document archiving. At the time of writing these reports are compiled by a system administrator to check processes and procedures before going fully autonomous. Furthermore the DATRO DAO is expected to be able to autonomously summarise changes and place a link to the previous report in the changelog (of the most recent report).

This DAO is also expected to autonomously execute an alternative to written and signed legal agreements (encoded scripts known as cryptocurrency smart contracts). Unique cryptographic addresses are also used to replace government issued identities to eliminate identity theft, fraud and corruption. The concept of loans, interest and other such financial instruments surrounding promissory notes isn't new. But the decentralised, autonomous organisation (DAO) method is DATRO's preferred method of automating the transactions and record-keeping of this business area. You may also see our DAO referred to as a DAS (Decentralised, Autonomous Society) due to the large number of stakeholders involved which constitute the organisation being a stand-alone society.
