5.1	The Team @ DATRO Consortium	20

The internet (specifically web 3.0) is great, but accessing the internet remains an affordable privilege, courtesy of autocratic and centralized service providers. DATRO is a consortium of free, publicly available, technology solutions (democratic and decentral in nature) - designed to make internet access a free, human right.

This publications details DATRO's investments:

- Investments made in DATRO
- Master shareholders register
- Investment rounds (seed, startup, series A etc)
- Base-interest rates (accruals & compounding)

RELEASE NOTES AND NOTICES

This section provides information about what is new or changed. It also contains urgent issues, documentation updates, maintenance and new releases. ‘Updates’ are the term used to describe significant changes to our public source code and/or records.

1.1 This Release (Version 0.0.7)

- **2021-May-09** - *Fixed issue with cells numbering format which put commas in the data and effected the csv comma scrape, resulting in some blank cells*
- **2021-May-08** - *Stopped using semantic version ‘0.1.x’. Using ‘0.0.x’ instead. And backdated when referencing older versions too e.g. 0.1.6 is now 0.0.6 etc*

1.2 Older Versions

Inherent with the update and re-release of this report is the inclusion of a reference to a downloadable, archived copy, of the previous report. In the table below the last entry should display a link to an archived copy of the last report, with an archive date matching the publication of this newly published report. The title of the download link may differ from the filename. This is mainly to keep the filename from overflowing in the table below.

Table 1: Older Versions of this Document

1.2.1 Version 0.0.6

- **2020-Jun-11** - Added dates to the changelogs under each version - which DATRO is now implimenting on all source code changelogs and document releasenotes
- **2020-Jun-10** - Remove the interest segment, since the additional data was causing confusion - The objective of this report was to keep it simple
- **2020-May-12** - Changed document title from 'WRT Tokens' to 'DATRO Consortium - Investors (Detailed)'
- **2020-Feb-25** - Document file structure updated to a uniform format across the entire document library e.g. path/{ 'latest' or '0-0-0' }
- **2020-Jan-01** - Last remaining WIN Token account (ID:300) migrated to WRT as per T&C's (WIN Token scheme is now terminated)
- **2019-Sep-14** - D. Allen made contact to query his account. A correction was made
- **2019-Sep-10** - C. & A. Doick made contact to query their account. A correction was made

1.2.2 Version 0.0.5

- **2019-Aug-14** - M. Simpsons account queried, it's showing nil tokens or investment. Corrections made
- **2019-Aug-14** - D. Owens account queried, it was showing nil investment. Corrections made
- **2019-Aug-15** - J Smith-Walker's account was queried and a corrections made

1.2.3 Version 0.0.4

- **2019-Jul-27** - Updated to include interest to date, a feature introduced in April 2019
- **2019-Jul-28** - Calculated for the CBT Scheme and affiliation with banking application Revolut

1.2.4 Version 0.0.3

- **2019-Mar-23** - Updated to include newly reconsiled accounts

1.3 Known and Corrected Issues

Below is a table of pending issues which have been reported to our team. When these issues are remedied they will be cleared from this, ahead of updated releases of this document.

Table 2: Known Issues

Date	Version	Subject	Description
2021-05-09	0.0.7	Interest	The rate of interest and back-date for both investors and creditors is being revisited

INTRODUCTION

In this document are the latest public records corresponding to the DATRO Consortium's investment accounts. This document also introduces readers to the concept of Decentralized Finance (DeFi) and DATRO's Decentralized Autonomous Organisation (DAO): Innovative technologies and methodologies adopted to manage investments in a way which outperforms the traditional, institutional approaches e.g. shares in a company and/or quarterly and/or annually dividends, via fiat currency using banks etc

2.1 DeFi & DAO

The DATRO Consortium DAO is, by design, able to operate fully autonomously, with full anonymity and without any central point of control. In this model, blockchain and cryptocurrency is used to manage ownership of the consortium, voting rights and distribution of royalties and interest to the consortiums various groups of beneficiaries - especially and including our investors.

The DATRO consortium comprises of a myriad of cryptocurrency smart contracts, making the DATRO Consortium what is known as a Decentralised Autonomous Organisation(DAO)'s. The very solution DATRO is offering in order to free, democratise and decentralise access to internet is itself attempting to be built and maintained in a similarly free, democratic and decentralized way.

DATRO's beneficiaries e.g. recipients of revenues are grouped into several cryptocurrency smart contracts e.g. developers, financeers (investors/ lenders), end-users etc. This publication focuses specifically on reporting the most recent activity, data and statuses of the investors accounts. The corresponding smart contract is then able to autonomously scrape this data from this latest publication in order to autonomously, anonymously, equitably and accurately (in real-time) distribute royalties from our network to our investors.

DATRO's revenue from our network, pool together into a top level 'escrow' smart contract, which (after singalling fees/ "gas") autonomously allocated 56% to an end-user smart contract, before distributing the remaining 44%, evenly, to the developer and financier (investors and lenders) smart contracts, which in turn distribute funds accordingly. In the case of the financiers smart contract, the interest is proportionately settled as a matter of priority to curb compounding of accrued interest. The remaining balance is then distributed equitably to the investors as a base rate of interest e.g. 16.6% APR since the policy was introduced.

Once the investors have received the base rate of interest, the remaining balance is distributed to investors in the form of royalties e.g. dividend of profits. The blockchain being considered for this role is Polkadot (particularly for its ability to scrape data) and its versatile and popular cryptocurrency: DOT.

Cryptocurrency tokens are awarded to stakeholders in order to permit them eligibility to receive these funds by signalling to the corresponding smart contract, the destination wallet address where the royalties are to be sent. Furthermore the tokens represent a fair vote in alterations to the groups corresponding smart contract. For more information about DATRO please visit: <https://datro.xyz>

SEED FUND ROUND (SUMMARY)

See below a summary of the seed funding investment round (account ID & aliases) and the corresponding account balance for each investor. The final balance includes all deposits, withdrawals, accrued and compounded interest (16.6% APR per annum, from April 2019).

Table 1: DATRO Investor Accounts - Including Accrued Interest (GBP)
