This document is case study of the DATRO Consortium “Campus One”: A dedicated, off-grid, technology campus for our Consortium. The document features releasenotes, which discuss administration of this document itself e.g. changes, version control, issues, etc. The layout of the document closely resembles a Prince 2 (project management methodology) highlight report - which as standard includes:

- *plans vs performance*
- *issues, risks and concerns*
- *plans moving forward*

Situated in the “Dominican Alps” - A group of ski lodge style villas, 6km beyond Jarabacoa town in the Dominican Republic. First visited by our consortium in 2011. This document is a brief report about the activities at what we now refer to as “Campus One”.
